DRONITECH ™

Infrastructure, Agriculture, Media & Entertainment . . .
We serve them all

We provide your business with the important data it needs to optimise operations, take less risk and do smart productive work. We provide a software suite of applications as per your industry thereby taking you leaps ahead in getting the critical information required to make smarter business decisions. Our bouquet of UAV services is spread across all Industries.

" Drones are going into business.
Having already made the leap from military to consumer use, they're now headed for industries from construction to cinematography to law enforcement. Noah Poponak, aerospace and defense senior equity research analyst in Goldman Sachs Research, lays out how he sees drones evolving into a $100 billion market by 2020."

- Noah Poponak, Global Investment Research
